primeVIEW

Data You Care About, Simplified

Century Therapy Plus

Do your clinical and therapy assessments align?

Drive an added layer of efficiency to your primeVIEW dashboard with the *Century Therapy Plus* module. It's a first-of-kind technology for comparing a resident's therapy assessments to those conducted by clinical staff. Automating this time-consuming process of tracking and comparing data empowers senior care operators to better achieve goals.

IDENTIFY
Near real-time alerts tell you when therapist and clinical data does not match.

RESOLVE
Proactively address the differences before the care plan is finalized.

SAVE TIME
Reduce reliance on manual and time-consuming analysis of assessment and care data.

> This integration has the potential to convert two-hour meetings with therapy providers into 15-minute conversations over easy-to-compare assessments
> **– Jonathan Duvall, Sr. Director, primeVIEW Operations**

> "Patient care plans and the associated reimbursement are optimized only when all caregiver perspectives are integrated."
> **– Tammy Tuminaro, CEO, Century Rehabilitation**

Since 2003

For nearly two decades, Prime Care Technologies has delivered integrated data and tech solutions to senior care operators across 7,500+ U.S.-based facilities.
